

You should NOT implement any proposal that would lessen Indiana's Telephone Privacy Law. Before Indiana implemented this law, we received as many as 10 tele-marketing calls PER DAY. Now, we receive about 5 per week, which is still too many. I, as a private citizen who pays for a private phone, should have more right than anyone to decide who calls MY home. These calls are nothing more than pure harrassment, and I will fight to maintain my right to privacy.
